Scallops Harvested within Classified Production Areas:

All Scallops harvested within classified production areas are classified as B unless harvested within classified production areas where all other mollusc shellfish are classified of being Class A where such scallops may be classified as A.

Lapsed Classifications:

The classifications for the areas listed below have lapsed because they are no longer active, or because an insufficient number of samples were available for the review period, and are subsequently no longer classified.

Production Area

Species

Bannow Bay	Mussels
Waterford Estuary	Mussels
Cork Harbour North Channel East	Oysters (Gigas)
Dunmanus Bay	Urchins * See Note 5
Castletownbere	Urchins * See Note 5

Notes:

Note 1 Seasonal Classifications

Where the data shows a clear seasonal trend over a number of seasons, different classification categories apply for different seasons. Details, where applicable, are given in column VI above.

Note 2 Preliminary classifications

Classifications are described as preliminary when an area is being classified for the first time or after a period in suspension. The term may also be used where an incomplete dataset of results was to hand.

Note 3 Dormant Fisheries

Fishery has been dormant for at least 12 months, and limited monitoring data is available. Sites that remain dormant are in danger of their Classification becoming lapsed due to a lack of monitoring data. Producers should contact their local SFPA office if Re-activating in order that monthly classification monitoring sampling may resume.

Production Area

Species

Carlingford Outer	Mussels
Clifden outer	Clams
Achill North Bealacragher	Mussels
Foyle M1	Mussels

Note 4 Short Term Classification

Where there are clear seasonal patterns to commercial activity in class A or B areas, in consultation with and enforced by local fishery regulations, monitoring may be considered for a reduced period of the year. This should start at least one month prior to the harvesting season for class A areas and two months prior to the season for class B areas and then continue throughout the season in prior agreement with the SFPA.

Production Area

Species

Inishkea Island	Razor Clams
Achill North Sound	Native Oyster

Note 5 Classification of echinoderms

It is No longer a requirement to classify harvest sites of echinoderms.
